

DIVER MASTER SALVAGED BY J.A. REDERIET

The Danish Tug **Diver Master**, which sank at the Port of Esbjerg water ways on 4. August 2014, in a very trafficed area, whilst assisting the huge tall ship **Kreuzenshtern** under departure, was salvaged this weekend by **J.A.Rederiet**. **J.A.Rederiet** utilized a set of short current slacks to manage this special job, which included lifting the tug from the seabed and tow her underwater to quayside, where she was refloated. This was the 3rd salvage job this week for **J.A. Rederiet**, who refloated 2 yachts at Randers earlier in the week, where sunk following an incident with a coaster. Today the salvage team is working outside Bogense, where yet another yacht sits firmly aground.
