

Preserved lightships

This list contains all known lightships that are preserved up to today, regardless of whether they were preserved as museum ships and open to the public or are rebuilt to be a restaurant ship, residential ship, club home or even a church ship.

A complete overview of lightships from all over the world can be found under "[Lightships around the world](#)" - for example an overview of lightships rebuilt as sailing ships will be found under "[Rebuilt lightships](#)".

If you know more lightships or other information, that should be added to this list, I would be grateful for each [e-mail](#).

You will find only a summary of data of the individual lightships in this table. For more info and photos please click on the photo in the corresponding line.
